This action is in response to the election filed on 9/15/05.

Election/Restrictions

1. Claims 11-15 are directed to an allowable product. Pursuant to the procedures set forth in the Official Gazette notice dated March 26, 1996 (1184 O.G. 86), claims 1-10, directed to the process of making or using the patentable product, previously withdrawn from consideration as a result of a restriction requirement, 1-10 now subject to being rejoined. Claims 1-10 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Since all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement made in the Office action mailed on 8/16/05 is hereby withdrawn.

Reasons for Allowance

2. Claims 1-15 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Claim 1 limits the formation of an optical interference type display to sequentially forming a plurality of first conductive optical film stacks, a second plurality of conductive optical film stacks, and a plurality of connecting pads near the edges of the substrate and made of a transparent conductive layer of the first conductive stack. Claim 11 limits the optical interference type display to having a plurality of first conductive optical film stacks, a second plurality of conductive optical film stacks, and a plurality of connecting

pads near the edges of the substrate and made of a transparent conductive layer of the first conductive stack. This limitation, in combination with the other limitations of claims 1 and 11 are not taught or suggested by the prior art of record. Miles (US005835255A) forms a plurality of optical film stack containing a conductive transparent layer, but does not teach or suggest connecting pads made of the same layer as the transparent conductive layer or even the same material as the transparent conductive layer. Tsai (US2005/0068605A1) also does not teach or suggest connecting pads made of the same layer as the transparent conductive layer or even the same material as the transparent conductive layer.

Claims 2-10 are allowed as being properly dependent upon allowed claim 1.

Claims 11-15 are allowed as being properly dependent upon allowed claim 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
